

## Prevent the spread of communicable diseases in the workplace by:

Implementing policies to support staff who have symptoms of a communicable disease, so they can avoid being at work when sick.

Supporting employees in receiving vaccinations for COVID-19 and other vaccine-preventable conditions.

Providing hand-hygiene facilities with appropriate supplies, washing hands regularly and covering coughs and sneezes.

Maintaining a clean environment through routine cleaning processes that are appropriate for the industry and work practices.

Ensuring building ventilation is adequate and ventilation systems are properly maintained and functioning as designed.
